About

Many AI projects work well as demos.

The real challenge begins when you want to turn them into actual features within an existing product.

That's exactly where I help companies.

I integrate production-ready AI features end-to-end into existing .NET products using LLMs, RAG, MCP, Copilots, and agentic workflows.

Thanks to my .NET background, I cover not only the AI side, but also backend development, APIs, databases, UI, testing, and deployment.

Typical use cases:

- RAG assistants for internal knowledge
- Copilots for existing software
- Agentic workflows for process automation
- LLM integration into .NET applications and APIs
- Integration of internal tools and systems via MCP

Tech: C#, .NET, ASP.NET Core, Blazor, EF Core, SQL, REST APIs, Azure & Python.

Want to enhance your existing .NET product with AI?

Free, no-obligation 30-minute call:
<https://calendly.com/hello-haris-abbasi/30min>

Learn more about my services:
<https://haris-abbasi.com/>

Or message me directly on LinkedIn or at hello@haris-abbasi.com.

3mo •

Hat jemand Interesse am Claude Certified
Architect Exam, scheitert aber daran, dass aktuell
nur Teams mit mindestens 10 Personen
zugelassen werden?

Wir hätten noch freie Plätze in unserem Team.

Bei Interesse gerne kurz melden.

 Saleha Khan
